

MARICOPA COUNTY SECURITY BUILDING

Complete renovation of the historic security building located at Van Buren and Central in Phoenix. This is a remodel of an old building that is presently occupied and must remain operational while it is being brought up to today's codes. The structure is 275,000 square feet and has 12 stories.

We are involved in the design assist to LSW Engineering (Jerry English). For us, the job consists of the total renovation of the building power distribution, fire alarm system, as well as lighting and branch receptacles. We are currently determining the design criteria for the installation of a new 500KW generator
