To Whom It May Concern:

We are happy to provide this letter of recommendation for JFK Electrical Contracting Enterprises, Inc. JFK consistently provides top quality electrical services to their projects, and are a value-add to any team. If any company deserves being awarded Accredited Quality Contractor, it's definitely JFK Electrical Contracting!

Johnson Carrier has had the pleasure of working with JFK on several projects, including the following three:

- Superstition Springs Toyota, a 243,000 SF, \$11M Dealership housing a parking structure and Service Department.
- ASU Global Institute of Sustainability, a 48 000 SF, \$5.9M facility located on the ASU campus.
- National Vitamin Company, a 315,00 SF, \$8.5M design/build manufacturing facility in Casa Grande, Arizona.

During these and other projects, JFK demonstrated their dedication to safety, both to their employees as well as everyone associated with each job. Not only do they provide quality service, but also a safe environment for those associated with a project.

Their involvement with ABA is far-reaching and includes serving on Chair, Board of Directors and Committee Members, as well as being an avid supporter of the ABA apprenticeship program and providing on-the-job training and schooling for the future of the industry.

JFK is also heavily involved in various philanthropic endeavors, giving back to the community thru organizations such as Sunshine Acres, Future Builders Academy, Skills USA and MASD.

We wholeheartedly support granting JFK the "Accredited Quality Contractor" designation.

Regards,

JOHNSON CARRIER INC.
