To Who it May Concern:

Dear Sir or Madam:

My project team and I completed a Beverage Expansion Project. This project was a design/build at the Pearce Distributing Facility in Phoenix, Arizona.

It was my pleasure to be able to work on this project with a qualified electrical Subcontractor such as JFK Electric. On a few occasions when a field problem arose, JFK was quick to investigate the situation and offer solutions in a timely manner in order to keep the electrical activities on schedule. I have worked with several electrical Subcontractors on other projects and I would recommend JFK Electric without hesitation. They have always worked on projects with the Owner's best interest in mind and have gone out of their way to treat all parties fairly and be a true team player.

Sincerely,

Rick Weiss
